PROFESSIONAL SUMMARY

IT leader with 25 years of progressive responsibility owning enterprise infrastructure and service delivery for a 700-user national IP law firm across seven U.S. offices. Holds dual accountability for network, identity, cloud, and security infrastructure and for a five-person support organization. Sole enterprise administrator for iManage Cloud v2, including ethical wall and Security Policy Manager governance; absorbed a departing systems administrator's full infrastructure and application portfolio with no service interruption or added headcount. Delivers high-risk migrations and relocations inside non-business windows so the firm never loses a billable day.

LEADERSHIP & OPERATIONS

Team Leadership & Development • IT Service Management • Vendor Rationalization • Infrastructure Lifecycle Planning • Access Governance & Compliance • Business Continuity

TECHNICAL SKILLS

Cloud, Identity & Microsoft Infrastructure: Microsoft Entra ID (Azure AD), Azure, Microsoft 365, Exchange Online, Intune, Entra device join, Conditional Access, MFA, Okta, AWS, Windows Server, Active Directory, Group Policy, DNS, DHCP, File & Print Services

Networking & Security: Palo Alto NGFW, Panorama, GlobalProtect VPN, Cisco, Aruba Wireless, TCP/IP, VLAN, Routing & Switching, Mimecast, Darktrace, SysxSense, CyberArk EPM, CompTIA Security+

Virtualization & Storage: Hyper-V, Failover Clustering, Storage Spaces Direct (S2D), Cluster Shared Volumes, enterprise storage, backup & restore

Legal & eDiscovery Platforms: iManage Cloud v2 (Control Center, Security Policy Manager, ethical walls, Work 10, DeskSite/FileSite), Relativity, RelativityOne, ARM, SQL Server

Automation & IT Operations: PowerShell, iManage REST API, Microsoft Graph, CSV-driven bulk administration, FreshService ITSM, ticket workflow design, SLA and escalation management, identity lifecycle and deprovisioning, software license inventory, Adobe Admin Console, DocuSign

PROFESSIONAL EXPERIENCE

■ KNOBBE MARTENS

Jul 2001 – Present

National intellectual property law firm — 700 users, seven U.S. offices | Irvine, CA (Remote)

Sr. Network Administrator & IT Support Manager

Jan 2026 – Present

Promoted to dual role: infrastructure ownership plus leadership of the firm's support organization.

- Lead and develop a five-person Systems Support team as final escalation authority for the firm's support organization.
- Own FreshService ITSM as platform administrator — led selection and implementation to replace the firm's legacy platform, then redesigned assignment to balance workload, ending a pattern of technicians self-selecting simple tickets and eliminating a single-point dependency where meeting and AV support defaulted to one technician.
- Assumed a departing systems administrator's full infrastructure and application portfolio with no service interruption and no added headcount — Hyper-V and Storage Spaces Direct cluster infrastructure, Relativity and RelativityOne, and the endpoint security stack — then authored the operations runbooks that removed the resulting single-person dependency.
- Serve as sole enterprise administrator for iManage Cloud v2 across all 700 users — workspace governance, Security Policy Manager, and ethical wall administration, owning the technical enforcement of client-matter confidentiality screens firm-wide.
- Lead the firm's transition from a domain-joined estate to Entra ID device management, spearheading a partner laptop pilot that replaces personally-owned machines connecting by VPN and RDP with firm-managed, Entra-joined devices.

Sr. Network Administrator & IT Support Manager (continued)

Jan 2026 – Present

- Lead consolidation of remote access from dual VPN clients to a single Palo Alto GlobalProtect platform, timed to the Cisco AnyConnect contract renewal — retiring duplicate client support across 700 users and eliminating redundant licensing.
- Own identity and access lifecycle firm-wide — Active Directory security and distribution groups, Exchange Online across 795 mailboxes (560 user, 235 shared), and multi-platform deprovisioning across Active Directory, iManage, and Adobe.
- Administer the firm's email and endpoint security platforms — Mimecast, Darktrace, and SysxSense — and perform endpoint privilege administration within CyberArk EPM across 738 managed endpoints.

Sr. Network Administrator

2009 – Dec 2025

- Led a four-phase document management modernization — network file shares to on-premise iManage, to iManage Cloud, to Cloud v2 — for all 700 users, executing each cutover across a Friday-to-Sunday window with users operational Monday morning.
- Automated iManage workspace administration via PowerShell and REST API, replacing a five-year manual process that pulled reception staff from their assigned duties to hand-move documents — bulk restructuring of hundreds of documents now completes in minutes rather than days.
- Extended PowerShell automation to Active Directory user and group administration, network share permissions, and Exchange Online mailbox delegation.
- Own a recurring four-to-five-year network refresh cycle across seven offices, executing lifecycle replacement of core and access-layer switching; standardized firewall policy and remote access through Palo Alto NGFW, Panorama, and GlobalProtect.
- Deployed and administered Entra ID, Microsoft 365, Exchange Online, and Intune, establishing a hybrid posture spanning domain-joined infrastructure and Intune-managed corporate devices under compliance policy.
- Maintain a five-node Hyper-V and Storage Spaces Direct cluster — 25 production virtual machines across a 422 TB pool, including the Relativity estate on a dedicated 105 TB Cluster Shared Volume, litigation NAS, and on-premises SQL.
- Maintain Relativity and RelativityOne infrastructure — SQL Server, ARM archival, and storage capacity — sustaining integration continuity for litigation and eDiscovery teams through platform migration.
- Executed 15 office relocations across all seven firm locations, delivered within compressed Friday-to-Sunday windows with users operational Monday morning and zero business-day interruption.
- Delivered 30+ trial war room deployments over 15 years, converting hotel conference space into full litigation command centers in two- to three-day builds under zero-fail conditions across Seattle, San Francisco, Los Angeles, San Diego, and New York.

Jr. Network Administrator

2005 – 2009

- Served as primary on-site IT resource for the San Diego office while providing remote support to San Francisco, Los Angeles, Seattle, New York, and Washington, D.C.
- Assumed first litigation and trial support responsibilities, establishing the on-site deployment practice later scaled firm-wide.

Systems Support Technician

Jul 2001 – 2005

- Delivered Tier 1 and Tier 2 support across the firm's Windows desktop, application, and network environment; supported iManage DeskSite/FileSite clients and off-site trial and hearing setups.

EDUCATION

Bachelor of Science, Information Decision Systems

2000

San Diego State University — San Diego, CA

CERTIFICATIONS

Active: CompTIA Security+ ce (exp. 2028) • Microsoft Azure Fundamentals • Okta Identity Foundations

In Progress: Microsoft AZ-104: Azure Administrator Associate • CyberArk EPM administration training

Previously Held: AWS Solutions Architect – Associate • ISC2 Certified in Cybersecurity — knowledge verified, renewal planned
